Private Equity and Venture Capital

OVERVIEW

In addition to boasting two world-class national laboratories, New Mexico is home to high-tech, green-tech and other new-tech private companies, and scientist-entrepreneurs that collectively have impacted and will continue to impact the economic and social fabric of our state, the nation, and the world. New Mexico is also rich with cultural and creative enterprises, natural resource developers, and other businesses of great importance to our economy.

EXPERIENCE

From Early-Stage to Mature Companies

When businesses are seeking financing, from start-up and technology transfer entrepreneurs to mature companies of all kinds and sizes, Modrall Sperling lawyers have represented a range of entities.

Our services to these clients have included assistance with entity formation, venture capital financing, bridge loan financing, private placements, traditional bank financing, and technology licensing and general corporate and business matters.

Venture Capital, Angel and Other Investors

Our lawyers have represented investors in venture capital and angel investment transactions, bridge loan financings, conversions of warrants, options and bridge loans, and related matters. Our work on behalf of investors has included transactions and due diligence in a number of industries, such as oil and gas, renewable energy, mining, technology, healthcare, real estate and entertainment.
