

# Energy, Environment and Natural Resources

## OVERVIEW

Modrall Sperling fields an industry-leading practice in the inter-related disciplines affecting development, transactions, regulation, and litigation involving energy, resources, and the environment. Our practice in these areas, while grounded in the diverse geography of New Mexico, is regional and national in scope. We understand energy and resource development in the complex landholding patterns of New Mexico and the Southwest and are skillful in guiding developers through the layers of regulation in a manner that proactively addresses potential hurdles and defuses governmental and community opposition. We are fluent in the law governing water, energy and mineral resources, and renewable sectors.
